

IMPORTANT!

Laminate Floor Care Instructions

Please Read Below

Congratulations on your new flooring installation from Carpeturn.com! Please follow these instructions to maintain the manufacturer & installation warranties.

Wipe floors with a warm moist cloth and gentle cleaner designed for laminate flooring. Be sure to follow the directions on the bottle.

Remove loose dirt with a dust mop or a gentle vacuum without a beater bar.

Do not use scouring pads, steel wool, sandpaper or other abrasive products.

Do not clean using excessive water as it could cause your flooring to buckle or separate. Always remove excess water or spills right away.

Never wax, polish or use buffing machines. Do not use beater bar with your vacuum.

Floor mats should be labeled non-staining. Oil or petroleum based products can result in discolorations. We suggest a non-staining vinyl-backed mat or a woven rug that is colorfast.

Limit direct sunlight for prolonged periods of time with use of blinds, shades, or awnings.

Maintain room temperature between 65 and 85 degrees.
