Wood Floor Care Instructions

Please Read Below

Congratulations on your new flooring installation from Carpeturn.com! Please follow these instructions to maintain the manufacturer & installation warranties.

Spills and tracked-in dirt should be wiped up right away. Wipe floors with a warm moist cloth and gentle cleaner designed for hardwood flooring.

Sweep, dust, or vacuum using a hard floor attachment once a week or more if needed. Do not use vacuums with beater bars or hard heads.

Always remove excess water. Do not allow liquids to stand on your floor.

Never use buffing machines, steel wool or scouring powder which is abrasive and will damage your floor's finish.

Floor mats should be labeled non-staining. Oil or petroleum based products can result in discolorations. We suggest a non-staining vinyl-backed mat or a woven rug that is colorfast.

Limit direct sunlight for prolonged periods of time with use of blinds, shades, or awnings.

Maintain room temperature between 65 and 85 degrees.
